

## HOW TO USE YOUR RE9 Advanced TESTER TOTE

Congratulations!

You are on your way to keeping your youthful skin with Arbonne RE9 Advanced!

Use just a pea drop of each product as they are highly concentrated!

### Step 1: CLEANSER (day and night)

Wet hands and face. Lather the gel in hands and smooth on face in circular motion. It will remove eye makeup!

### Step 2: TONER (day and night)

Spray onto your face and circulate everywhere to bring back your skin's proper PH.

### Step 3: SERUM (day and night)

Use just a pea drop. Place little dots around the face and blend well into entire face. This is the most highly concentrated product of this line and contains vitamins A C and E peptides and other great anti-aging and exfoliating elements that help produce and build collagen!

If you develop a slight redness or irritation (like after a facial) the first couple of times (or get a couple of blemishes) it is because it is removing toxins from your skin and your blood is rushing to the vitamins. This is good and means it is working. It is not an allergic reaction. It is an amazing product and the redness will stop once your skin adjusts. You might want to use at night only for the first couple of days to allow your skin to get used to the high concentration of vitamins.

### Step 4: EYE CREAM (day and night)

Just a dot will do. Use fourth finger. Place below eye and at brow and circulate gently around eye. Don't put it too close to your eye. It will automatically move in to all eye areas.

### Step 5: DAY CREAM/NIGHT CREAM (depending on the time)

The Day Cream (the protector) has SPF 20. Choose between the original day cream and the one with extra moisture!

The Night Cream (the corrector) truly helps to restore your skin. It's the "I am sorry" to your face for not drinking all those glasses of water all day!

### If You Have Sensitive Skin

You may wish to introduce the products over a few days so that your skin can adjust.

Day 1: Wash & Toner; Day 2: Add Day Cream & Night Cream;

Day 3: Add Eye Cream; Day 4: Add Serum

### Enjoy!

Arbonne products are free from parabens, animal fat/by products, mineral oil, (petrolatum) and chemical fragrances/dyes. Arbonne has Swiss Heritage. The RE9 products are pure and the key ingredients are sea buckthorn, kudzu and many other plant extracts. Their scents are from natural fruits. ENJOY the citrus refresher!

I look forward to seeing you in a few days and showing you the best way to place your order so that you will have the most value for your dollar.
