

RE9 ADVANCED

Use exclusively for 3 days and nights

Step 1 RE9 wash

Just one pea size drop is all you need for your face. If you want more lather add more water, not more product.

- cleans and hydrates without stripping, if your skin felt "Squeaky clean" with other cleansers, you destroyed your protective acid mantle!

Step 2 RE-9 toner

Hold toner approx.6 inches from nose and spray once directly on face using fingers to spread over entire face.

- Toner restores acid mantle since water disturbs it (water is a 7 on the pH scale).
- It is packed with nutrients for your skin.
- Toner visibly tones, firms, and smoothes the skins surface.
- Toner will help minimize pores.

Step 3 Serum

Just one pump of serum is needed to cover entire face.

- Serum gives wonderful long-term effects. Feeds the skin vitamins A, C and E
- Diminishes lines, wrinkles and acne scars.
- The alpha hydroxyl acids breakdown the glue that holds the dead skin cells to the skin. When you next wash, the dead skin cells come away leaving your face with that translucent glow.
- Serum also contains anti oxidants in a targeted time release system called nanospheres.

*slight pinkness or tingling is normal for some skintypes

Step 4 Eye Cream

Just 1/2 pump of eye cream is needed to be applied to ring fingers. Dab under eyes, between brows and to upper lip.

- Moisturizes, reduces appearance of dark circles & puffiness.
- Protects and repairs delicate tissue around eyes.
- EYE CREME IS ALSO GOOD FOR AGE SPOTS and above the top lip to reduce fine lines.

Step 5 Day and Night Cream

Just one pump of day cream is needed to cover entire face.

- Day cream hydrates, nourishes and protects.
- Reduces the appearance of fine lines and wrinkles.
