

THE ARBONNE DIFFERENCE

Empowerment.
Transparency.
Sustainability.

INGREDIENT POLICY

PLANT BASED INGREDIENTS

All of our formulations start by picking the right botanical that provides functional benefits that are always backed by research.

HIGH CLEAN STANDARDS

Our products are vegan, cruelty-free and formulated without gluten.

CO-DEVELOPED WITH EXPERTS

We collaborate with the leading experts in integrative medicine and holistic health. Our Scientific Advisory Board brings their guidance and expertise to our portfolio and education.

SCIENTIFIC TESTING

We subject all our product formulations to rigorous testing for safety and efficacy, and continually raise our standards by leveraging the latest innovations in science and research.

OUR MISSION: SAFE, CLEAN PRODUCTS

Arbonne has been one of the leaders in the pure products movement since 1980. Our internal list of prohibited ingredients has evolved over time based on our safety evaluation of ingredients using sound scientific principles. Arbonne was scrutinizing ingredients and establishing stricter guidelines before others in the industry. Arbonne's commitment to safe, clean products is stronger than ever and we applaud all brands that support this movement and join our mission. Arbonne goes way beyond the nearly 1,400 ingredients restricted for use by the European Union and the several hundred by the US FDA. Adhering to the strict Arbonne Ingredient Policy, we maintain a list of over 2,000 ingredients that are **NOT ALLOWED** in Arbonne products.

Our NOT ALLOWED List™ is defined by 4 clear attributes:

MISSION ALIGNMENT

Ingredients that conflict with our pure standards of gluten-free, vegan, non-GMO, and no artificial colours, flavours or sweeteners are **NOT ALLOWED**. Arbonne will never test on animals.

SAFETY

Ingredients that have high levels of irritation or toxicity, a high allergen content, those that are known hormone disruptors, cancer causing, or have negative consumer press are **NOT ALLOWED**.

LEGISLATION

Ingredients that are being considered by our existing countries as possibly banned in the future are **NOT ALLOWED**.

ENVIRONMENTAL

Ingredients that are harmful to the environment and have a negative impact on communities are **NOT ALLOWED**.

NOT ALLOWED TOP 20

Our **NOT ALLOWED** List™ includes more than 2,000 ingredients — nearly 1,400 from the European Union, plus several hundred more — that we won't use in any of our formulas across our categories including skin care, personal care, hair care, nutrition, and makeup. Healthy living inside and out includes what we choose to include in a formula — and what we don't. This list directly reflects Arbonne's rigorous screening of ingredients, our research, and enhanced safety requirements that ultimately result in safer ingredient choices and effective products in line with our Pure, Safe, Beneficial™ philosophy and further defines what it means to be Certified Arbonne Clean™. We go above and beyond because we care. See the list of nearly 1,400 ingredients banned by the EU: LIST OF SUBSTANCES PROHIBITED IN COSMETIC PRODUCTS – Annex II (total: 1,395)

OUR PRODUCT PHILOSOPHY

We take an integrative approach that focuses on the whole person to help them flourish inside and out.

Certified

A force for
good for
people
and planet.

Certified B Corporations are businesses that meet the highest standards of verified social and environmental performance, public transparency and legal accountability to balance profit and purpose.

SCIENTIFIC ADVISORY BOARD

NAISSAN WESLEY, MD, FACMS

Dr. Wesley is a Diplomate of the American Board of Dermatology and fellowship-trained Mohs micrographic surgeon. The author of over 20 published articles in the field of cosmetic dermatology and dermatologic surgery. Dr. Wesley is the invited Guest Editor of the first “Skin of Colour” issue of Seminars of

Cutaneous Medicine and Surgery and invited journalist for the Aesthetic Section of Dermatology News. She is a member of the American Society of Dermatologic Surgery, American Academy of Dermatology, and American College of Mohs Surgery. Dr. Wesley completed medical school and residency at the University of California, San Francisco and a Mohs and cosmetic dermatology fellowship at Skin Care Physicians in Chestnut Hills in Los Angeles, CA, and she is also a Clinical Instructor of Dermatology at the University of California, Los Angeles (UCLA).

PETER LIO, MD

Peter A. Lio, MD is a Clinical Assistant Professor of Dermatology & Pediatrics at Northwestern University Feinberg School of Medicine, a Fellow of the American Academy of Dermatology, and a Diplomate of the American Board of Dermatology. Dr. Lio received his medical degree from Harvard Medical

School, completed his internship in Pediatrics at Boston Children’s Hospital, and his Dermatology training at Harvard where he served as Chief Resident in Dermatology. While at Harvard, he received formal training in acupuncture. Dr. Lio served as a full-time faculty at Harvard from 2005-2008 before returning to his native Chicago to join Northwestern and Lurie Children’s Hospital. He is the founding director of the Chicago Integrative Eczema Centre and has spoken nationally and internationally about eczema and atopic dermatitis, as well as alternative medicine. He has published two textbooks, over 100 papers in the peer-reviewed literature and has received a Leader of Distinction Award and a Presidential Citation from the American Academy of dermatology. His special interests include pediatric dermatology, eczema, acne, dermatomyositis, and other inflammatory diseases of the skin, and he works to integrate alternative and complementary medicines in dermatology.

WILL BULSIEWICZ, MD, MCSI

Will Bulsiewicz, MD, MCSI is the New York Times bestselling author of the book Fiber Fueled. He’s also an award-winning gastroenterologist, gut health expert and the author of more than 20 articles in the top American gastroenterology journals. He’s a graduate of Georgetown University School of Medicine and was chief medical resident at Northwestern Memorial Hospital and chief gastroenterology fellow at the University of North Carolina Hospitals. He lives in Charleston, South Carolina, with his wife and two children.

RAJA SIVAMANI, MD, MS, AP - CHAIR

Dr. Raja Sivamani is a board-certified dermatologist and practices as an integrative dermatologist at Pacific Skin Institute. He is an Adjunct Associate Professor of Clinical Dermatology at the University of California, Davis and Director of Clinical Research and the Clinical Trials Unit. He is also an

Adjunct Associate Professor in the Department of Biological Sciences at the California State University, Sacramento, and an Associate Professor of Dermatology at California Northstate University, College of Medicine. He engages in clinical practice as well as both clinical and translational research that integrates bioengineering, nutrition, cosmetics, and skin biology. With training in both Allopathic and Ayurvedic medicine, he takes an integrative approach to his patients and in his research. He has published over 110 peer-reviewed research manuscripts, 10 textbook chapters, and a textbook entitled Cosmeceuticals and Active Cosmetics, 3rd Edition with a passion for expanding the evidence and boundaries of integrative medicine for skin care.

KULREET CHAUDHARY, MD

Dr. Kulreet Chaudhary’s combined expertise in both modern neurology and the ancient science of health known as Ayurveda has uniquely positioned her as an expert able to pull from the broadest possible base to treat her clients. She is passionate about raising awareness for the need of a paradigm shift in

contemporary medicine that focuses on patient empowerment and a health-based (rather than disease-based) medical system. Dr. Chaudhary is a regular guest on the Dr. Oz show, where her teachings about Ayurvedic medicine have been applauded by a national audience. Dr. Chaudhary was the Director of Wellspring Health in Scripps Memorial Hospital for ten years and remains a pioneer in the field of Integrative Medicine. She has successfully developed a powerful system to manage chronic neurological disorders such as multiple sclerosis, Parkinson’s disease and migraine headaches, by incorporating fundamental changes in diet, behavior, and stress, in addition to the standard allopathic approach to these issues. This program has been so successful that many patients now use it not just for neurological issues but also for a wider range of health concerns, including weight issues and chronic disease. Dr. Chaudhary is the author of The Prime and Sound Medicine and has appeared as a medical expert on numerous programs including the Dr. Oz show and Home & Family. She is also a neuroscientist and has participated in over 20 clinical research studies in the areas of multiple sclerosis, Alzheimer’s disease, Parkinson’s disease, ALS, and diabetic peripheral neuropathy. Her research includes ground-breaking work in stem cell therapies for diabetic peripheral neuropathy and drug development for the treatment of ALS.
