

ARBONNE® Ingredient Policy

The Arbonne Promise: To deliver pure, safe and beneficial products in line with our botanical tradition.

Pure: Arbonne is committed to the development of unparalleled products free of harmful ingredients, using a combination of botanical principles and scientific discovery. Our commitment begins with research and testing to ensure that each of our ingredients meets or exceeds industry standards for purity.

Arbonne personal care and nutrition products are vegan certified: Our formulas are never tested on animals and do not contain animal derived ingredients or animal by-products. We firmly believe a full list of our formula ingredients should be made available to our consumers through published materials and product labeling.

In our ongoing commitment to ingredient excellence, we have been successful in replacing parabens by using other safe and effective preservation systems. We have also put into place an ingredient policy to screen out gluten and ingredients that contain GMO. We will bring to market top-quality products that are carefully reviewed to meet our high standards of purity.

Arbonne personal care products are formulated without:

- PABA
- Animal products or animal by-products
- Formaldehyde-donating preservatives
- Parabens
- Petroleum based ingredients:
 - Benzene
 - Mineral oil
 - Petrolatum
 - Phthalates
 - Toluene

Arbonne nutrition products are formulated without:

- Artificial colors
- Artificial flavors
- Artificial sweeteners
- Animal products
- Animal by-products
- Cholesterol
- Saturated fats
- Trans fats

Safe: Arbonne is dedicated to the safety of our products and our consumers. We review our ingredients and our formulas based on the most objective, conclusive, scientifically supported sources available.

In addition to our strict internal Purity and Safety Ingredient Policy, Arbonne abides by the global rules and regulations set by the U.S. Food and Drug Administration (FDA), Health Canada, the National Industrial Chemicals Notification and Assessment Scheme (NICNAS), the Personal Care Products Council (formerly the CTFA), the Cosmetics Internal Review (CIR) and the Therapeutic Goods Administration (TGA) and by the two highest standards of cosmetic safety: The European Union Cosmetics Directive and the European chemicals agency known as REACH (Registration, Evaluation, Authorization and Restriction of Chemicals). We also embrace the European Commissions Scientific Committee on cosmetic and non-food products (SCCNFP), which conducts safety evaluation on cosmetic ingredients. In addition, all our fragrances are formulated in accordance to the International Fragrance Association (IFRA) standards.

The dietary supplement industry is regulated by the US FDA and the Federal Trade Commission (FTC), as well as by the gov-

ernment agencies in each of the fifty United States. The FTC monitors the advertising of dietary supplements to ensure appropriate and substantiated claims are being made. Arbonne rigorously adheres to the regulations for all dietary supplements. All dietary supplements are submitted for pre-market notification, follow strict labeling requirements, execute mandatory adverse event reporting, and ensure that Good Manufacturing Practices (GMPs) are followed as well as appropriate facility registration.

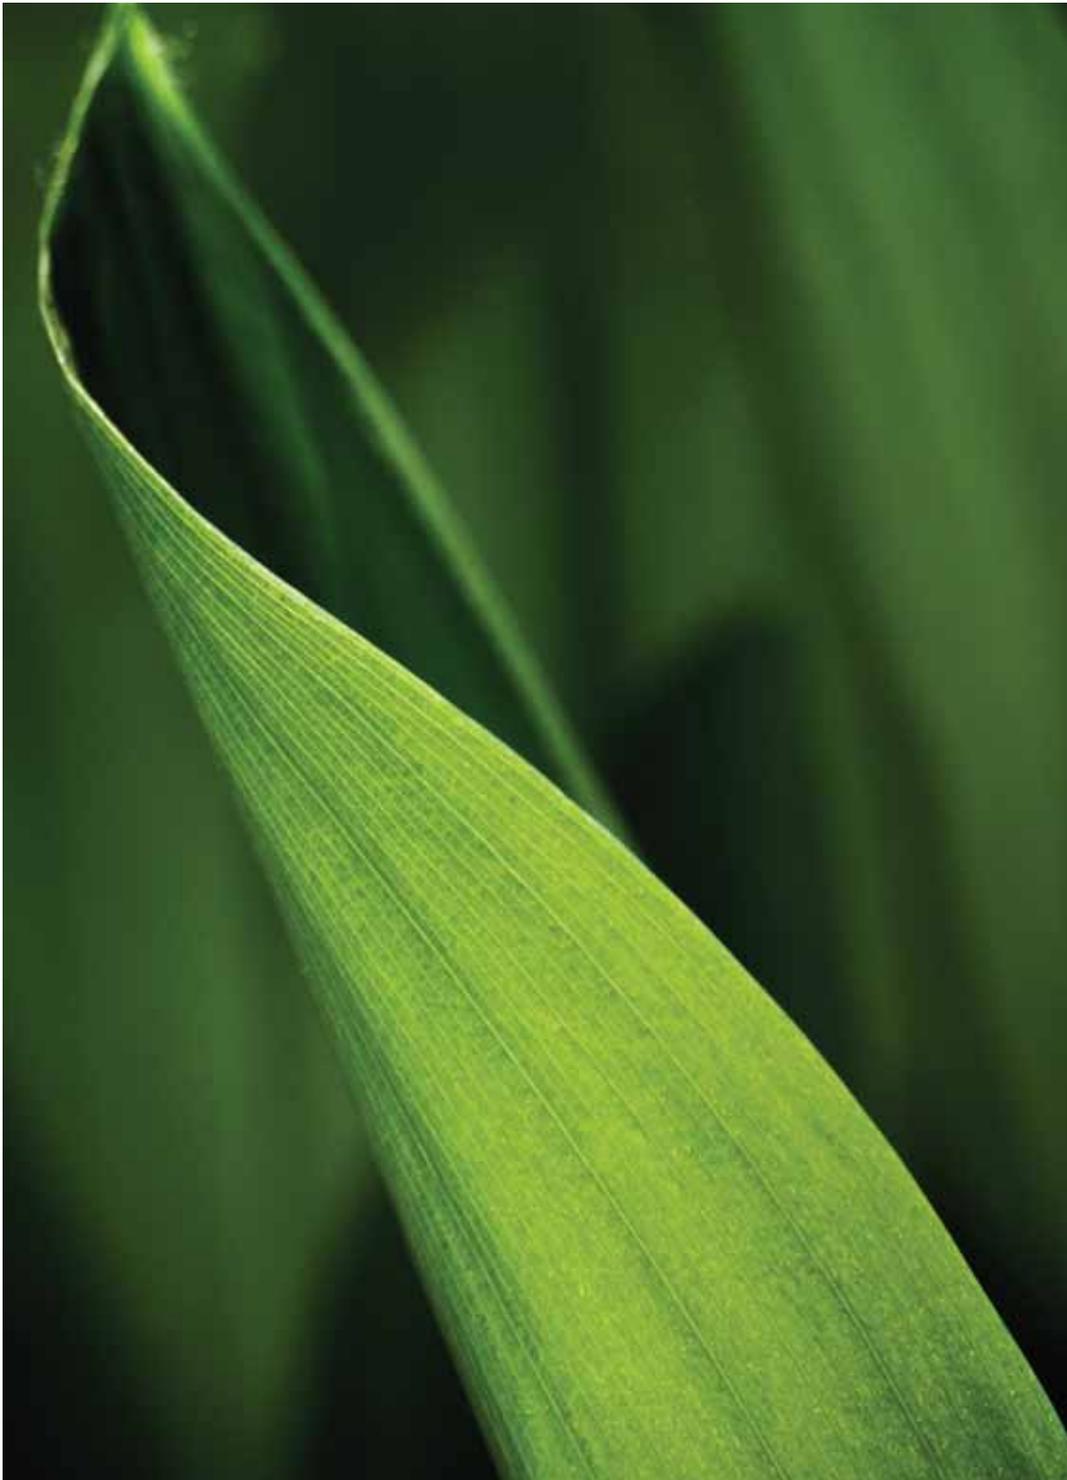

Before Arbonne brings any products to market, we ensure all ingredients undergo rigorous safety assessments, and finished formulas pass strict safety testing to ensure their highest quality. These safety tests include irritancy and allergy testing for all products, ophthalmology testing for eye products, dermatologist testing for all beauty products, and additional pediatrician testing for baby products.

Beneficial: Arbonne offers premium quality beauty, health and wellness products with targeted results. We employ consumer and clinical testing to reinforce our research and ensure our proprietary formulas deliver unparalleled performance.

Arbonne Products

At Arbonne, beauty begins with premium botanical ingredients, an integrative approach to beauty and an unwavering commitment to pure, safe and beneficial products. Arbonne creates personal care and wellness products that preserve and enhance the skin, body and mind. Working closely with scientists around the world and our Arbonne Institute of Research and Development (AIRD®) facility in Switzerland, we continually explore and develop scientifically advanced, botanically based proprietary formulas that meet our exacting standards for quality, safety and sustainability.

Æ ARBONNE®

Green Commitment

Arbonne is committed to environmental responsibility. As our business grows, we strive to minimize our impact on the earth through the implementation of innovative and responsible environmental practices, and we encourage our manufacturing and sourcing partners to do the same.

At Arbonne we:

- support responsible harvesting of our botanical ingredients (harvest and replenish).
- never utilize endangered plant species in our formulations.
- are vegan certified: our products do not contain animal-derived ingredients or animal by-products and are never tested on animals.
- practice “source reduction,” optimizing packaging and product design to use less materials.
- use renewable sources for all of our paper packaging.
- strive to achieve Forest Stewardship Council (FSC) certification for all paper packaging.
- incorporate post-consumer recycled (PCR) content in all shipping cartons and plastic packaging, wherever possible.
- print with soy-based inks wherever possible.
- ensure our distribution facilities have recycling programs for all incidental packaging and shipping supplies.

Continuous improvement is critical to our commitment. We routinely review our ingredients, packaging materials and business operations to optimize our positive contribution to defending and protecting the earth’s resources.
